DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmitz, et al..

Schmitz in figs. 2, 9 and 10 disclosed a speed sensor for a moving member 6 having a ferromagnetic insert 6.5 or outside groove 6.4, a sleeve having two coils (8.1,8.2) and two magnetic assemblies or annular pole pieces (30.1,30.2) mounted in opposition to each other on a common axis, which assemblies are separated by a spacer or annular permanent magnet (7.1).

3. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Lequesne.

Lequesne in fig. 1 disclosed a speed sensor for a moving member 10 having a ferromagnetic insert 15 secured to a nonmagnetic portion 13 of the moving member, a sleeve having two coils (32,33), annular pole pieces (17,18), and a spacer or annular permanent magnet (20).

Allowable Subject Matter

4. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record disclosed or reasonably suggested the combination of the sleeve has two permanent magnets, each magnetic assembly having one of the permanent magnets, and with the permanent magnet being mounted around its coil.
